This was not pleasant news to the congregation, as his sermons have been much enjoyed.

## Influenza Brought On More Troubles For Her

Mrs. Nettie M. Ainsworth of 81 East avenue, Montpelier, says: "I suffered for five years with stomach and bladder trouble and rheumatism. I got the influenza some time ago and right after that I developed a bad cough. I suffered with terrible pains in my knees from the rheumatism and my kidneys bothered me so I had to get up many times during the night."

"Finally I began taking Goldine. It has certainly helped me in every way. I only have to get up once in the night now since taking Goldine, and it has relieved the rheumatism about as well as I could ever expect. I feel better in every way since taking Goldine, and I am going to tell all my friends about it."

Ask Edward McNulty about GOLDINE and what it has done for him.

Goldine is sold in Barre by Cummings & Lewis and all leading dealers throughout this section, including the towns of East Barre, S. Barre, Westerville, Grantville, Williamstown, Washington, W. Townsham and Brookfield.—Adv.

## Potatoes for Seed!

The short season last year gave us a large proportion of potatoes too small for the Number One grade.

We delivered the Number Ones and put the leftovers, which included small and cut specimens, in the cellar.

For a quick sale we now offer these potatoes, as they come from the cellar, at one dollar per bushel. Reasonable quantities will be delivered as far as Woodsville.

The state inspector stood ready to certify our Number Ones for Green Mountain seed. This stamps their quality.

Most of those now offered are ideal in size and shape for seed. Occasional specimens are not.

## COAL FACTS

No. 2

The coal production at the present time is perhaps 60 per cent of normal production. We have had a warm winter; consumption has been comparatively light. On April 1, however, we entered upon a new year in coal matters.

If the normal quantity of coal is to be produced during the next twelve months, it is plain that during the spring and summer when conditions of mining are best and conditions of transportation least liable to interference and the CONDITIONS OF

RETAIL DELIVERY MOST ECONOMICAL, at least 50 per cent of a year's tonnage should be mined and distributed.

The patriotic citizen will do his part during these reconstruction days as willingly as he did during war times and will order his coal and receive it to the best of his ability during the next six months. By so doing he will make it possible for the merchant to give him his best service, and at a MINIMUM COST.

This means you and concerns your family.
